This risk disclosure is proposed to inform you of the risks that exist in trading activities on forex and financial markets. You have to distinguish that these risks require a chance of losing money while trading. This disclosure and warning notice is informational and must not be considered a list of all possible risks.

A. The use of Leverage

Basically leverage is an investment strategy by using of borrowed money. In forex margin trading, leverage can have a significant impact on your trading account even with minor changes in exchange rates and instrument prices as well. It is must have to comprehend that if the market moves in the opposite direction to your open positions then your chances of losing your preliminary deposit and other funds proposed to maintain your open positions will be very high. Besides you will be fully responsible for the use of your own funds and accounting to risks.

B. Uncertainty and Insecurity of Financial Instruments

The quotes of most of the instruments are traded on forex as well as financial markets that may be varied noticeably over the course of a day, that might be bring you a profit or a loss.

C. Procedural Technical Risks

It is to ensure that AVFX Capital is not responsible for financial losses by arising from any malfunctions in your electronic, communication or information systems.

When you are working with the client terminal you have to assume the risks rising from various way such as:

- a) There may be failures in your equipment or failures in software or internet connection.
- b) Rising errors in your client terminal settings.
- c) Failure to update your software version of the client terminal in a systematic and timely manner.
- d) You may be failure to follow the instructions by using the client terminal.

So, as per above those aspects AVFX Capital is not responsible for any errors or problems raised from your side that could occur in the operation of the client terminal and will not reimburse losses resulting from errors in the

operation of the client terminal. Because we have a non-exclusive right to use the trading software MetaTrader-4 or MetaTrader-5 trading system as client terminal for a specific purpose and this is to inform you we don't have the right to provide you the technical support.

D. Market Risks

Market risks refer to the uncertainty associated with any investment decision. If price volatility often arises due to unexpected fluctuations in factors that commonly affect the entire financial market. You need to agree that if market conditions become abnormal or unusual, the time required to process your orders and instructions may be increased.

E. Risks associated with the Legal Laws of Individual Governments

It is ensure that the responsibility for trading and non-trading operations performed within any countries By which they need to follow, restricted or prohibited by such country's legal law as well as regulations.

F. Risks Associated with the Trading Platform

- Ensure that all of your instructions are sent to our official server and executed those by order. Therefore, you cannot send a second order until your previous order has been executed as well. If the second order is received before the first is processed, then second order will be rejected automatically. You may assume responsibility for any unplanned trading operation that may be executed and if you re-submit an order before being notified of the results of the first order.
- You must know that closing the order window or position window does not cancel a submitted order. Simply, once order has been submitted then that cannot be canceled from client side.
- You recognize that only the quotes received from our official system server are authoritative or imposing. If there is a problem in the internet connection between your client terminal and our server, you can do retrieve undelivered quote data from the client terminal's quote database.

G. Communication risks

- You must know that the risk of any important information sent through unencrypted email may be accessed by unauthorized parties.
- Therefore, AVFX Capital is not responsible for any type of financial losses arising from delayed or failed of receipt of a company message.
- However you are responsible for the security of the important credentials for your Personal Area and trading accounts as well as the confidential information that we sent you. Make sure AVFX Capital is not responsible for any financial losses by arising from your disclosure of this information to third parties.

H. Force majeure events

AVFX Capital is not responsible for any types of financial losses arising from force majeure events. Because these events are totally irresistible circumstances that are independent of the will and actions of the agreement participants at all.

Especially majeure events are cannot be foreseen or prevented or eliminated and including but not limited to natural disasters such as:
