

The screenshot shows the AVFX website interface. At the top, there is a navigation bar with the AVFX logo and the text 'FOREX FOREVER'. To the right of the logo is a language selection dropdown labeled 'اختيار اللغة' with a Google Translate icon. Further right are three buttons: 'Create Account' (green), 'Log In' (red), and 'Copy Trading (New)' (red). Below the navigation bar is a secondary menu with links: 'Markets', 'Trading Accounts' (circled in red), 'Trading', 'Partnership', 'Promotion' (with a 'NEW' tag), 'Calenders', 'Education', 'Refer a Friend', and 'About Us'. Under 'Trading Accounts', there is a sub-menu with 'Trading Platform' (circled in red) and 'Trading Support'. A red arrow points to 'Trading Platform' with the text 'Click this'. To the right of the sub-menu is a circular icon containing a candlestick chart. Below the navigation bar is a large promotional banner. On the left, it says 'TRADE YOUR BEST' in large white letters on a red background, followed by 'Win Amazing Prizes in Every Month!'. Below this is a red button with 'Register Now' and a right-pointing arrow. On the right side of the banner, there is a large red sports car with a red bow on its hood, and below it are four smaller cars (red, white, red, blue) also with red bows. A speech bubble on the right says 'WE ARE ONLINE NOW!' with a 'SPEAK TO US' link. At the bottom right of the banner is a green button that says 'Create Live Account'. The text 'with Fast Direct Execution' is visible at the bottom left of the banner.

- Currency Panel/Symbols:**

-The Client Terminal gets quotes from the server are listed in the "Market Watch" window.

-The data are represented in this window as a table having several fields. The "Symbol" field contains the security name, the fields of "Bid", "Ask", and "Time" show the corresponding prices and time of their income from the server. Values of the "Maximum" and "Minimum" fields are calculated on basis of price changes within a day.

The screenshot displays the MFX trading platform interface. On the left, a list of currency pairs is shown with their current and previous prices. Below this is a 'Navigator' section with tabs for 'Common' and 'Favorites'. The 'Terminal' section at the bottom shows account statistics: Profit/Loss: 0.00, Credit: 0.00, Deposit: 0.00, and Withdrawal: 0.00. The 'Account History' tab is highlighted in the bottom navigation bar. A right-click context menu is open over the 'Account History' tab, showing options: All History, Last 3 Months, Last Month, Custom Period..., Save as Report, Save as Detailed Report, Commissions, Taxes, Comments, Auto Arrange (checked), and Grid (checked).

← Right Click to show the options

- Lower Left side there is the tab “**Account History**”
- To see how profitable your trades have been and to better avert any losses in the future.
 - All of history is then clearly presented in the format of a table with many different fields that are allotted.

What is MARKET & PENDING ORDER?

- **Market Order** is a commitment to the brokerage company to buy or sell a security at the current price. Execution of this order results in opening of a trade position. Securities are bought at ASK price and sold at BID price. Stop Loss & Take Profit orders can be attached to a market order. Execution mode of market orders depends on security traded.
- **Pending Order** is the client's commitment to the brokerage company to buy or sell a security at pre-defined price in the future. This type of orders is used for opening of a trade position provided the future quotes reach the pre-defined level. There are four types of pending orders available in the terminal: **BUY/SELL LIMIT, BUY/SELL STOP**.

What is BUY & SELL LIMIT?

- **Buy Limit** – buy provided the future "**ASK**" price is equal to the pre-defined value. The current price level is higher than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having fallen to a certain level, will increase;
- **Buy Stop** – buy provided the future "**ASK**" price is equal to the pre-defined value. The current price level is lower than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having reached a certain level, will keep on increasing;
- **Sell Limit** – sell provided the future "**BID**" price is equal to the pre-defined value. The current price level is lower than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having increased to a certain level, will fall;
- **Sell Stop** – sell provided the future "**BID**" price is equal to the pre-defined value. The current price level is higher than the value of the placed order. Orders of this type are usually placed in anticipation of that the security price, having reached a certain level, will keep on falling.
